There are new stirrings of insurrection in the Island of Cuba. Nothing is more natural; it is impossible that well-educated men, accustomed to the enjoyment of liberty when traveling in the United States and other countries, should long submit in patience to the tyranny there imposed upon them. And it is impossible that a Government which exercises such tyranny should not be alarmed at the most insignificant demonstrations of hostility. There is no prebability that any considerable movement is on foot in Cube, but it does not take much to create a panie in the minds of the Spanish officials of the Island. It is evidently such a panic which forms the subject of our telegraphic dispatch giving the news brought by the steamship Isabel to Charleston.

MASSACRUSETTS holds her Annual Election to-day, and will poll a great vote. We cannot foretell the result, but the chances seem to be in favor of the Whigs. The main issue is the adoption or rejection of the New Constitution, and we guess that will be rejected. Had its friends seen fit to district the State fairly and equally for Representatives, they could not bave been beaten: Now their chances are at best even. There is scarcely anything more impolitic than

Wisconsin has gone what is called Democratic, as was expected. The first returns are unfavorable to the Maine Law, as the German and Irish vote of the Lake Counties weigh heavily against it, but we do not yet give up that it is beaten. It has at all events recelled a large majority of the votes of all who could write and read the "Yes" or "No" that was voted. If heaten now by the compact resistance of the Foreignborn voters, in friends will redouble their exertions in To the People, nor yet to any mutually chosen umpire, enlightening the masses, and carry the State at no dis but by a self-constituted, irresponsible, political secret

OUR NEW LEGISLATURE.

Correcting our tables in accordance with the latest reports, we believe our next Senate will stand-Whigs, Hards, 5: Softs, 2; still in doubt, 3.

The Assembly will consist of about 80 Whige, 28 Hards, 20 Suits, and 2 Free Democrats. Several of the Hards, with two or three of the Softs, and one or two Whige, were elected on Maine Law tickuts without reference to party designations, but we have classed them, for convenience' cake, with the parties to which

they have respectively belonged. The two Free Demcerats were indebted to Temperance for a great portion of their votes, as were many Whigs and some Democrats besides.

We believe that not less than 20 of the 32 Senstors, with 80 of the 128 Assemblymen, are in favor of the speedy enactment of the Maine Law.

NEW-JERSEY.

The Reformers and Whigs of New-Jersey are defeated, but it was in an honorable contest gallantly sustained. Such a defeat in such a struggle is the sure precursor of victory bereafter. In fact, it is not the rout of an old. well-organized party, battling for familiar and long-sought ends, but the initiatory discipline of a new one, ignorant of its own numbers and resources, and aiming at the establishment of a novel and radical policy. As far as the present election goes, any other result than the rejection of this policy by the majority of the voters was scarcely to be expected. But for the future it is full of encouragement.

Five years ago there was no such thing in New-Jersey as opposition to the Monopoly which exhausts, oppresses and degrades the State. There was no such thing as opposition to that fruitful source of pauperism and crime, the trade in alcoholic drinks. Anti-monepoly and anti-ram were unknown ideas and unheard or words. Now they are the very turning points of political warfare, and rally in their support a phalanx comprising but little less than half the electors. Last June even, there was no party in existence to dispute the possession of power with the Monopoly. Now there is a great party, which, though beaten to-day, bears within it the augury of success, and will yet redeem and revivify the State. That an organization so powerful and so promising, pledged to a policy so thorough and decided, should have grown up in so short a time, is, indeed, a reason for rejoicing on the part of every friend of popular progress and public welfare.

The Whigs of the State are now more than ever to be congratulated in their wisdom and courage in taking the manly ground of Reform. They have lost from their ranks some men who have been wont to answer at roll call, but who are sold to the Monopoly and enslaved to alcohol. It is a good loss, and will be more than made up by better men. When railroad companies, rum, and "democracy" all combined cannot secure more than five thousand majority for their Governor, and that with great efforts and lavish expenditure of both cash and liquor, the day when the people will get the better of them all is certainly not remote.

THE TAMMANY SOCIETY.

There was a contest, nearly a year ago, between two rival organizations, each claiming to include a majority of the delegates chosen to, and thus to constitute, the true Democratic Republican General Committee of the City of New York This contest was decided, so far as any decision was temporarily had-not by a recurrence conclave, calling itself - Tammany Society, or Columbian Order," which had no more rightful authority in Mississirit his gone what is called Democratic- the premiers than the Grand Lama. But no mattertate and disorganizing in the eyes of the thouand emilder any thing regular and Democratic which pursee engrent there. It is melaneboly, but some the less true, that the andivided postersion of that Hall is worth five thousand votes to the party thus favored. And the Hard-Shell Committee, exited to Storregant Institute, have ever since been twitted by the Nofts of "roseting in the old Stuyresant pear-tree," and the ilke-as though their exclusion from Tammany settled the question against their regularity; and the frequenters of Tummany have been taught to believe that John Van Buren, Sheperi, Grover & Co. were, and Charles O'Conor, Brady, Ac were not the true oracles of National Democracy.

But, on the first appeal to the People, the Softs, with all the advantages which the possession of Tammany, the prestige of regularity and the patronage of both National and State Administrations would give them. have been signally beaten. The average vote for the Hard State ticket is from Three'to Four Thousand higher than that for the Soft. We take it for granted that the Tammany Society will not attempt to hold out against this decision of the court of last resort, but will obey the People's mandate and reinstate the Adamantine General Committee.

But should the matter stop here? Ald. Barr, the Chairman of that Committee, is a Senator elect, and stands morally pledged to probe the iniquity whereof said Committee has been the immediate victim to the bottom. It is not enough that the present wrong should be undone, so far as a tardy atonement can be made. Indemnity for the past is impossible, but security for the future should be enforced. It is monstrously wrong that any secret, self-elected, close corporation should have power to influence the politics of the City, State and Nation as this Tammany Society now does. The usurpation is hardly paralleled on the darkest pages in the history of Venetion Oligarchy. Submission to its perpetuity is voluntary debasement. And we look to Ald. Barr to devise the fitting remedy and demand its application.

The corner stone of the Berlin Water-Works was laid on October 21st. Four hundred and twenty thousand inhabitants will thus be accommodated with the pure element. Mr. Schramke, a German draughtsman, formerly engaged on the Croton Water-Works, returned to Berlin, in 1844, examined the face of the country about the town, and found a series of small lakes, some twelve miles north of it, of such an elevation as could supply a reservoir about sixty feet high on a hill immediately outside the walls. The reservoir will be capable of throwing water into the third or fourth story of every house in Berlin, as that city is on a sandy plain. Every facility exists for constructing these water-works, as the country to be passed through is exceedingly level, and being sandy is easily dug. The glory of the Croton Works, therefore, has not ended with New-York: nor will it end with Berlin, for its influence must extend from that city to others in Europe.

Some six years ago Mr. Schramke submitted his plan | American workmen could not produce a carpet of American to the Berlin authorities, and it was so evidently good that capitalists at the time were ready to take hold of it and push it immediately through to completion. All things of the kind, however, in Europe are overlaid by the Government, and when not destroyed by such aid. as it is called, their growth is either tardy or puny, or both. The force of a people so delegated must have the inferiority of a second-hand article. Hence the Government at Berlin impeded the commencement and will impede the completion of the water-works in

No idea is so important to the growth and development of liberty as to teach the people that they must do their own work, and not depend on Government, or allow themselves to be unduly restrained by it. If we urged this idea on the public as much as we think they need it, we might pursue it asque ad neuscam, in the opinion of our readers. If we properly study the philosophy of our history, we shall find our progress just in proportion to the directnemof the action of the people themselves in their own affairs, and the least possible operation of goverament functions. It may be urged in opposition to this view, that the bad government of New-York City York is not only an exception to the root of the United

every one that ever has existed, our argument applies to it, as may be briefly shown.

The great evils of New-York are not indigenous they are imported. Half the average resident population of New-York, besides a transient population of upward of three hundred thousand anqually, comes from Europe,-from places like Berlin, where the people have not learned to take care of themselves, but look to patriarchial officeholders for the performance of important social duties. These people when they come among us are amused with the interpretation of Democracy as rendered at Tammany-Hall: and, never having been accustomed to act vigorously in political matters or see that politicians are duly controlled, things of chief public momentsuch as security of property and life, cleanliness of the streets, maintenance of civic economy-are lost sight of, and the dreadul neglects and corruptions which we suffer from take their place.

If this population were fixed it would have the sense and time to look into its own affairs and execute its work with due decision and propriety. But what a rushing tide it presents! Wide open all our portals to the rest of the world. Thicker than ancient hosts of Goth or Hun, come the fortune-seeking myriads of Europe. Men ordinarily rush here, not as to the mild circle of a homestead,-not as to the genial rays of a fireside-not as to the fond embrace of a mothercountry, but as to a place to amass the most money in the least time. Those with intelligence have almost uniformly left politics in the hands of trading politicians; and it is because the public here have not done their individual duty-that we see the deplorable results before us. We have delegated too much to political charlatans; we have trusted to their performances of duties, which they have left undone, being too busily engaged in stealing the public money and our argument holds good, therefore, as applicable to New-York, as to the rest of the country.

We really are inclined to believe that if there were no municipal provision to keep the streets elean, they would to say the least, be in better order, (they could not be worse.) than they are now-and the logic of this position may be extended to other details of general importance, which suffer at the hands of maleficent functionaries.

ELECTION ITEMS.

SEVENTH SENATORIAL DISTRICT .- The returns on Sa

turday indicated the election of Stephens to the Senato from Westchester Rockland and Putnam Counties. Rockland gives Robertson 105, Putnam gives Stephens 121, the upper district of West-hester, 41 for Stephens. In the lower district of Westchester, Odell, Hard and Anti-Maine Law, is elected over Sec. Temperance Soft, and Whig, so that there is little likelihood that Robertson bas a majority. P. S.-Further returns from lower Westehoster show lebertson running better than Sec. NIAGARA Co .- We were wrong with regard to one of Members of Assembly from this County. Both are Adatines, elected by a coalition with the Silver Greys, and electing S. G. County Officers.

St. Lawrence Co .- Extract from a letter to the Editor. dated Ogdensburgh, July 10, 1853 Sixteen towns in St. Lawrence County give James 1,251 majority over Willard. The remaining towns in 1851 gave Allen 340 over James. James's majority will be at least 1,000 in this County.

The London Times should mend its knowledge and orthography touching Turkish Generals. It uniformly confounds Omar Pasha-commanding the division in Rumelia-with Omer Pasha Commander-in-Chief of the armies. These two single gentlemen should not be so rolled into one by a journal which boasts its superior acquaintance with the persons and things of the Ottoman Empire.

Republican simplicity" is a text of those who gull the laborers of this country late the belief that they are the only friends of the working man—that all who oppose the modern Soft-Shelled Democracy are extravagant purse proud Aristocrats. Let facts speak. Here is one very illustrative, which we take from an English paper—The Doily Mail: which we take from an English paper—The Daily Mail:

"Carry for the Presidency of the United States—Masset.
Templeton & Co., Glasgaw, have just completed a gorzeous carpot for the White House at Washington, the official residence of the Freident of the United States. This manifestes these of textile meaning terms about 10 feet long by 40 broad, the portion weren in the loom without sean being 72 feet by 31, and the remainder consisting of a handsome border sowed on. The filling in of the carpot is a ruby and crimson damank, with three tested and silicons in the center, and rich corner sieces to correspond. The medallions are filled up with bounded of howers, designed and executed with any spicial tester. The entire piece weights upward of a tun, and its value is between \$450 and \$250. This carpot is the largest of five now nearly complete \$6 for the Presidential mansfellow Mosers, Pempleton, and the whole of which require to be at Washington early in November." Will any of the soft brained Democrats answer that

wool sufficiently "gorgoons for a plain American President, or that such patronage and encouragement of American agri-enture and manufacture is what will produce the highest state of prosperity to the American people? We hope when this "magnificent piece of textile manufacture" arrives in this city, this very plain, unostentations, economical administration, will allow it to be opened, where it may be seen as through a glass darkly," by the "hard-fisted," "hard-"shelled," hard to understand their own interest working men. Possibly the exhibition may confirm them in their willingness to sink all the industrial arts of this country into a state of vassalage to foreign manufacturers. Two THOUS-AND DOLLARS for the carpet of one room of a plain Democratic President, paid to English manufacturers! Washingtenian, Jeffersonian, Republican simplicity!

TAX SALE AT ALBANY .- We have received a catalogue of 400 pages, indicating an immense number of lots of land in all parts of the State, now sold, or about to be sold, for arrows of taxes, at the Capitol at Albany. The sale commenced on Wednesday, the 9th lust, and must occupy all of the present and most of the coming menth. This is a very extensive sale; the last by the State under the old law. The first day was devoted to sales of lots in the City and County of Alba ny, and nearly completed, the purchases being confined to Chester Puckard and William D. Carrol, of Albany; Et-Mayor Baldwin, of Syracism; City of Albany; and a few offers organizate to the contrary, and what we need is others. The amount of tax due on any one percel is gone more direct government, and less comprehensive indi- rally small, and the average bids were about 50-200th of the vidual action.
